OTA ŠKVOR

UI/UX Designer | Product Design & Design Systems

Brno/Prague, Czech republic · +420 608101012 · ota.skvor@gmail.com · LinkedIn · **PORTFOLIO**

I'm a UI/UX Designer with 4+ years of experience in product design, design systems, and end-to-end design of web and mobile applications. At Seyfor, one of the largest software companies in the Czech Republic, I currently work on the Vema design system and design new product modules. I also bring a strong technical background to my design work — I collaborate closely with developers and have hands-on experience taking web projects from initial design through to a working front end. My approach combines thoughtful UX with clean, modern visual design and a strong focus on accessibility.

EXPERIENCE

Seyfor - UI/UX designer

Brno · 2024 - současnost

- Developing the design system and designing new user interfaces for Vema, a complex HR/ERP platform.
- Leading the design and development of a shared UI library with over 120 components and dozens of design patterns and screen templates, used by designers and other product team members.
- Designed and currently maintaining a three-tier design token architecture (global → semantic → component, 1,000+ tokens), covering colors, typography, and a wide range of numerical values used throughout the product.
- Designing UX/UI for new product modules covering payroll, invoicing, shift scheduling, internal communication, and more.
- Collaborating closely with front-end and systems developers, directly contributing to the implementation of more complex interfaces using the company's PDL/Python stack.
- Contributing to the standardization of design processes, documentation, and technical integration of the design system with the development environment and GitHub.

Freelance & Study - Product & Web Designer

Brno · 2022 - 2024

- Designed UI and UX for web and mobile applications across AI, gaming, entertainment, and healthcare.
- Frequently owned projects end-to-end — from client communication and coordination with other team members through design, technical implementation, SEO, and final deployment.

Proconom Software - UX/UI designer

Liberec · 2021 - 2022

- Designed corporate and product websites — from structure, user flows, and wireframes through prototyping to final UI.
- Contributed to the UX/UI development of the Proconom desktop application and designed a standalone internal subscription management application.
- Implemented selected designs as responsive websites in HTML, CSS, and JavaScript.
