

OTA ŠKVOR

UI/UX designer

Brno/Prague, Czech republic · +420 608101012 · ota.skvor@gmail.com · [LinkedIn](#) · [PORTFOLIO](#)

I'm a UI/UX Designer with 4+ years of experience in product design, design systems, and end-to-end design of web and mobile applications. At Seyfor, one of the largest software companies in the Czech Republic with an extensive ERP portfolio, I currently work on the Vema design system and design new product modules. I also bring a strong technical background to my design work — I collaborate closely with developers and have hands-on experience taking web projects from initial design through to a working front end. My approach combines thoughtful UX with clean, modern visual design and a strong focus on accessibility.

EXPERIENCE

Seyfor - UI/UX designer

Brno · 2024 - současnost

- Building out the design system and designing new user interfaces for Vema, a complex HR/ERP platform.
- Leading the design and development of a shared UI library with 120+ components and dozens of patterns and screen templates, used not only by designers but across product teams.
- Designed and own a three-tier design token architecture (global → semantic → component, 1,000+ tokens), covering color, typography, and a wide range of numerical design values used throughout the product.
- Designing UX and new user interfaces for a range of product modules, from payroll and invoicing to shift planning and internal communication.
- Collaborating closely with front-end and systems developers, contributing directly to the implementation of more complex UI in the company's PDL/Python stack.
- Actively contributing to improving internal processes and collaboration between design and other teams — from component creation, standards, and structured documentation to the technical integration of the design system with the internal development environment and company GitHub.

Freelance & Study - Product & Web Designer

Brno · 2022 - 2024

- Worked on freelance and academic UI/UX projects across a range of industries — from mobile applications to web products in entertainment, iGaming, and healthcare.
- Frequently owned projects end-to-end — from client communication and coordination with other team members through design, technical implementation, SEO, and final deployment.

Proconom Software - UX/UI designér

Liberec · 2021 - 2022

- Designed corporate and product websites — from structure, user flows, and wireframes through prototyping to final UI.
- Implemented selected designs as responsive websites in HTML, CSS, and JavaScript.
- Developed the UI/UX of the Proconom desktop application and also designed a standalone internal subscription management application.
